

CHANDSA JACKSON

THE UNIVERSITY OF ZAMBIA

SCHOOL OF HUMANITIES AND SOCIAL SCIENCES

2004 ACADEMIC YEAR FIRST SEMESTER FINAL EXAMINATIONS

DE 111: INTRODUCTION TO DEMOGRAPHY

TIME: THREE HOURS

INSTRUCTIONS: Answer all questions in SECTIONS A, B, and C and any two questions from SECTION D

ANDREX - B

SECTION A: ANSWER ALL THE MULTIPLE QUESTIONS IN THIS SECTION

1. Choose one correct answer from each of the following statements:

a. A population with a median age of 27 is of intermediate age.

- i. True ✓
ii. False

below 20.
b/m 21-29
30 → older

b. A sex ratio measures the number females per 100 males

- i. True ✓
ii. False

c. Marx and Engels believed that each economic system has its own laws of population

- i. True ✓
ii. False

d. Thomas Malthus pioneered the construction of the life table

- i. True
ii. False ✓

e. The idea of the logistic curve of the population was made popular by Alfred Lotka

- i. True
ii. False ✓

f. In which year was the Demography Training and Research programme established at the University of Zambia

- i. 1978
ii. 1980
iii. 1986 ✓
iv. 1990

g. The Demography Training and Research programme at University of Zambia funded by:

- i. The Population Council
ii. UNFPA ✓
iii. UNDP
iv. WHO

h. Formal demography involves:

- I. The interdisciplinary approach to the study of demography involving biology and the social sciences
- II. The sociological analysis of population trends
- III. The economic analysis of process of population change
- IV. The collection and statistical analysis of demographic data

i. Population studies involves:

- I. The collection and statistical analysis of demographic data.
- II. The interdisciplinary approach to the study of demography involving biology and the social sciences
- III. The sociological analysis of population trends
- IV. The economic analysis of process of population change

j. One of John Graunt's contribution to development of demography was:

- I. Establishing that each economic system has its laws of population.
- II. Pioneering the use of statistical methods in evaluating demographic data.
- III. Refining the application of the logistic curve to the understanding of population growth
- IV. Establishing demography as a separate discipline

SECTION B (ANSWER ALL QUESTIONS)

2. Respond to all of the following questions:

- (a) What is the difference between the population growth rate and the rate of natural increase
- (b) How long will take a country with a 3.5% annual population growth rate to double its population? 20 yrs
- (c) What is the population (or balancing equation) equation? $\frac{3.5}{100}$
- (d) What is the difference between emigration and immigration?

$$\frac{70}{3.5 \times 10}$$

$$\frac{700}{35} = 20$$

20 yrs

3. Explain what is likely to happen to the population age structure in the following situations (underline what you consider to be the correct answer):

a. High fertility and low mortality:

The population ages / The population gets younger / Nothing changes)

b. Low fertility and low mortality:

The population ages / The population gets younger / Nothing changes)

4. On the basis of the data below, compute the relevant rates and interpret the results.

THE UNIVERSITY OF ZAMBIA
SCHOOL OF HUMANITIES AND SOCIAL SCIENCES
DEPARTMENT OF POPULATION STUDIES

TEST ONE
DEM 1110: INTRODUCTION DEMOGRAPHY

Instructions:

- ✓ Be brief and concise
- ✓ ANSWER ALL
- ✓ Duration: 1 : 30 MINUTES

SECTION A:

1. Which ONE of the following is correct about a sample survey?
 - a. Collection of information from a fraction of the population
 - b. Collection of vital events from a fraction of the population
 - c. Continuous registration of events from a fraction of the population
 - d. A complete enumeration of everyone from the population
2. Statistics refers to Numbers, Percentages, Figures that when put together in a given context give meaning on a particular subject matter
 - a. True
 - b. False
3. In demography, Trends and Patterns are all observed over time showing a general direction in which a situation changes;
 - a. True
 - b. False
4. Categorical data are data that comes into distinct groups such as sex, marital status, temperature, weight and money in the bank.
 - a. True
 - b. False
5. Descriptive statistics Involves methods of using information from a sample to draw conclusion about the population whereas Inferential statistics Involves methods of organizing, and summarizing information from data
 - a. True
 - b. False

SECTION B: ANSWER ALL

1. Which of the following best describes i) Formal Demography ii) Population Studies.
- Execution and administration of censuses *FD*
 - Computation of life expectancy using life tables *FD*
 - Projection of the population
 - Estimation of mortality and fertility using incomplete data
 - A study of the relationship between changes in income and fertility and mortality *PS*
 - A study of the relationship between educational attainment and declining levels of fertility. *PS*
 - An analysis of fertility trends and changes in consumption patterns *PS*
 - A study of the aging of population and changes in voting patterns. *PS*
 - The analysis of changes in demographic variables mathematically. *FD*
2. Demonstrate your knowledge of current affairs in population matters by answering the questions below:
- Who between John Graunt and Thomas Malthus was a clergyman? *Thomas Malthus*
 - Which two researchers worked on the idea of a logistic curve? *Raymond Pearl and Lowell Reed*
 - What is one major development in demography Edmund Halley is famous for? *improving life table*
 - Other than John Graunt, which other demographer worked on the idea of a life table?
 - When was the Office of Population Research established? *1936*
 - At which university was the Office of Population Research located? *Princeton University*
 - Who was the first Director of the Office of Population Research? *Frank Notestein*
 - Mention two regional institutes of population studies funded by the United Nations Population Fund (UNFPA). *(East Asia & Pacific, Africa & China)*
 - Which prominent American family is associated with the establishment of the Population Council? *Rockefeller John Rockefeller*
 - When was the Demography Training and Research Program at the University of Zambia established? *1976*
 - Which organization was responsible for the establishment of the demography training and research program at the University of Zambia? *United Nations Population Fund (UNFPA)*
3. Which of the following scenarios represent the following: i) The floating ii) Stagnant population iii) Latent population or iv) None:
- Population in town displaced by machinery *ii*
 - Population in rural areas with highly irregular employment *ii*
 - Population in the agricultural sector displaced by commercialization *ii*
 - Population with the lowest living standards and highly irregular employment *ii*
 - Population with high levels of employment resident in rural areas *ii*
4. List any FOUR characteristics of a Census. *Universality, Periodicity, Sponsorship, Legality*
5. Which of the statements below best describes: i) External Demographics ii) Cluster Marketing iii) Targeting iv) Segmentation v) Cluster Marketing or vi) None.
- Manufacturing and packaging of products or the provision of services that appear to specific socio demographics identifiable groups within the population.
 - Picking out particular socio-demographic characteristics of people who might purchase what you have to offer, and then appealing to the consumer tastes and behaviour reflected in those characteristics.
 - Targeting neighbourhoods with a where set of shared socio-demographic statistics.
 - Analysis of the demographic characteristics of the workers with a view of improving their conditions of service.

- e. Carrying out a market research and then aggressively advertising it on television and radio.

6. Define the following concepts:

- a. Proportion
- b. Pattern
- c. Level
- d. Trend
- e. De jure method of counting

7. On the basis of the data below, compute the relevant rates and briefly interpret the results.
- a. Overall dependency ratio for Zambia in 1980?
 - b. Child dependency ratio for Zambia in 1980?
 - c. Aged dependency ratio for Zambia in 1980?

Zambia (1980)

Age group	Population
0-14	3,349,672
15-64	3,842,792
65+	190,633

$$DR = \frac{0-14 + 65+}{15-64}$$

$$CDR = \frac{0-14}{15-64}$$

$$ADR = \frac{65+}{15-64}$$

$$CDR = \frac{\text{No. of death}}{\text{mid year pop}} \times 1000$$

- a) Crude death rate for Costa Rica in 1960

Costa Rica (1960)

Deaths	10,063
Population	1,171,000

$$CDR = \frac{\text{No. of death}}{\text{mid year pop}} \times 1000$$

- b) The sex ratio

Country X

Sex	Population
Male	3617577
Female	3765520

$$\text{Sex Ratio} = \frac{\text{No. of male}}{\text{No. of female}} \times 100$$

GOOD LUCK!!!!

END OF SEMESTER TEST

MONDAY, OCTOBER 18, 2010

SURNAME: NANOAMENQA..... FIRST NAME: DANYA.....

COMPUTER NUMBER: 10088064..... TUTOR: MS. A. NYIMENQA

TUTORIAL DAY/TIME: THURSDAY..... 12h-12h30

TIME: ONE HOUR (±15 MINUTES)

INSTRUCTIONS: ANSWER ALL QUESTIONS

1. What is your understanding of the following concepts:

- a) Population composition or structure
- b) Population growth or change

2. Which of the following statements best describes:

- a) Population studies
- b) Demography
- c) None

i. The interdisciplinary approach to demography involving biological and social sciences.

ii. The collection and statistical analysis of demographic data.

3. Given the examples below, which of these is an example of:

- a) Demography
- b) Population studies

i. Studies of the relationship between demographic and non-demographic variables.

ii. Studying changes in the life expectancy - age structure.

iii. Execution of censuses

iv. Impact of non-demographic variables on demographic variables

- d) Arithmetic progression
- e) Geometric progression

118 below
20-7
8

9. Demonstrate your knowledge of the age structure by answering the following questions:

- a) A population has a median age of 23 years, in what aging stage is it?
- b) How about a population with median age of 18 years?
- c) And one with median of 37 years?

10. Demonstrate your knowledge of age classifications by answering the following questions:

- a) In what age category is a 58 years old man?
- b) What age category does 76 year old woman belong to?
- c) How about a 23 year old woman?

END OF TEST

SCHOOL OF HUMANITIES AND SOCIAL SCIENCES
AUGUST 2015/16 ACADEMIC YEAR FINAL EXAMINATIONS
DEM 1110: INTRODUCTION TO DEMOGRAPHY

TIME: THREE (3) HOURS

INSTRUCTIONS:

ANSWER ALL QUESTIONS FROM SECTION A

CHOOSE ANY TWO (2) QUESTIONS FROM SECTION B

ANSWER ALL QUESTIONS FROM SECTION C

SECTION A: ANSWER ALL QUESTIONS IN THIS SECTION (40 MARKS)

1. Define the following concepts? Give an example for each.
 - a. Proportion
 - b. Inferential Statistics
 - c. Sex Ratio
 - d. Retrospective method
 - e. Categorical and Continuous data
 - f. Content and Coverage Errors
2. Using the 2010 population as a base figure (13,092,666) and annual population growth rate of 3.1 percent, how long will it take for this population to double and what will the population be then and in which year will this be?
3. Interpret the following demographic characteristics of a country called Izwe:
 - a. Total fertility rate of 5
 - b. Gross reproduction rate of 3.5
 - c. Net reproduction rate of 2.5
4. Briefly, in a few sentences, describe the process of population change using a balancing equation.
5. Briefly, in a few sentences, discuss the differences and similarities between crude birth rate, total fertility rate, completed family size, and net reproduction rate.
6. Give three (3) key points to consider when using charts to display data? *(be brief and Concise)*

7. Give three (4) inherent limitations of vital registration in Zambia? *(be brief and Concise)*
8. The collection of social and economic statistics is important for National and Development Planning, briefly outline the problems of collecting accurate Social and Economic Statistics in Zambia? *(be brief and Concise)*
9. As a newly employed Demographer at the Department of Registration and Passport Control (DRPC), suggest (3) ways to improve the registration of Vital Events in Zambia.
10. Outline four (4) inherent limitations in sample surveys? *(be brief and Concise)*

SECTION B:

ANSWER ANY TWO QUESTIONS FROM THIS SECTION (30 MARKS)

1. Answer the following:
 - a. Outline the principle sources of errors in socio-economic data
 - b. Give three (3) reasons why it is important to evaluate socio-economic data
 - c. Briefly describe the two types of errors
 - d. The Myers and Whipples Index are both used to detect age preference, what is the main difference between the methods?
 - e. Briefly describe the Passive and Active methods of registration of vital events
2. Discuss the importance and relevance of the following concepts in market research:
 - a. Segmentation
 - b. Targeting
 - c. Cluster marketing
3. Explain how demography can contribute to our understanding of the following problems:
 - a. Inflation
 - b. Environmental issues, particularly global warming
 - c. Energy shortages

SECTION C:

ANSWER ALL QUESTION FROM THIS SECTION (30 MARKS)

1. What in your view, were the major contributions of John Graunt and Thomas Malthus in the development of Demography as a scientific discipline?
2. Use Table 1 to answer the questions below.
 - a. Comment on the percentage of women currently employed by residence (rural/urban).
 - b. What type of graph would be appropriate to present the number of women by education?
 - c. Use an appropriate graph to display the distribution of women currently employed, not currently employed and those not employed in the 12 months preceding the survey. Give a comment based on the graph
 - d. What is the proportion of women aged below 39 years?
 - e. What is the ratio of female population in Copperbelt to that of Lusaka Province? Comment on the result
 - f. What graph would be appropriate to represent women's marital status?

$$P_c = P_0 + (B - P) + (I - 1)$$

INSTRUCTIONS: ANSWER ALL QUESTIONS. ALL ANSWERS MUST BE BRIEF AND TO THE POINT

TIME: ONE AND HALF HOURS

✓ With an example in each case, briefly explain the following:

- a) Formal demography collection of statistical facts and figures
b) Population studies ✓
- interdisciplinary approach to demography maintains the objectivity of scientific research
- Briefly explain the following:

2. Briefly explain the following concepts or terms:

- a) Segmentation Provision of products to myriad of identifiable segments
b) Targeting Pick one and focus on it

8. Explain how demography can contribute to our understanding of the following problems:

- (a) Inflation
(b) Unemployment

✓ Explain, very briefly in a few paragraphs only, the relationship between demography and the following disciplines:

- (a) Sociology
(b) Economics

✓ 8. Explain the following terms:

- (a) The floating population
- (b) Preventive checks
- (c) Positive checks
- (d) Latent population.

✓ 8. Demonstrate your understanding of fertility, mortality, and migration by describing the following:

- a) Total fertility rate ✓
- b) Completed family size
- c) Age specific death rate
- d) Life expectancy ✓
- e) Net migration

4. Give two examples of the uses and applications of demographics in the following situations:

- a) Political planning
- b) Legislative analysis

8. Demonstrate your knowledge of current affairs in population matters by answering the questions below:

COMPUTER NUMBER: 1108995 TUTOR: MR. ANDREWS BANDA

TUTORIAL DAY/TIME: THUR 08:00-09:00

INSTRUCTIONS: ANSWER ALL QUESTIONS

TIME: ONE HOUR AND HALF HOURS

1. Which of the following statements below best describes i) Population Size
ii) Population Structure iii) Population Change vi) Population Distribution v) None

- a) This is the number in absolute terms of people within a defined territory or space. *Population size*
- b) This refers to the constituent elements (parts, fractions or segments) that make up a population. These are expressed in absolute or relative terms. *Population structure*
- c) This refers to increase or decrease in absolute or relative terms of the population. *Population change*
- d) This refers to the location of the population in space or the dispersion or concentration of the in specific areas. *Population Distribution*
- e) The number of immigrants resident within a defined territory.

2. Which of the following scenarios represent the following: i) The floating
ii) Stagnant population iii) Latent population or vi) none:

- a) Population in town displaced by machinery *The floating population*
- b) Population in rural areas with highly irregular employment
- c) Population in the agricultural sector displaced by commercialization. *The latent population*
- d) Population with the lowest living standards and highly irregular employment *Stagnant population*
- e) Population with high levels of employment resident in rural areas *none*

3. Demonstrate your knowledge of history of demography by answering the questions below:

- a) Who between John Graunt and Thomas Malthus was a clergyman? *Thomas Malthus*
- b) Which two researchers worked on the idea of a logistic curve?
- c) What is one major development in demography Edmund Halley is famous for? *For improving the life table to fit*
- d) Other than John Graunt, which other demographer worked on the idea of a life table?
- e) When was the Office of Population Research established?

- 0 At which university was the Office of Population Research located? *Princeton*
- 1) Who was the first Director of the Office of Population Research? *Frank Y. Hammond*
- 2) Mention two regional institutes of population studies funded by the United Nations Population Fund (UNEPF). *UNEPF*
- 3) Which prominent American family is associated with the establishment of the Population Council? *John Rockefeller*
- 4) When was the Demography Training and Research Program at the University of Zambia established? *1986*
- 5) Which organization was responsible for the establishment of the demography training and research program at the University of Zambia? *UNEPF*

4. Which of the following best describes i) formal demography ii) population studies.

- a) Execution and administration of censuses *Formal demography*
- b) Computation of life expectancy using life tables *Population studies*
- c) Projection of the population *Formal demography*
- d) Estimation of mortality and fertility using incomplete data *Formal demography*
- e) A study of the relationship between changes in income and fertility and mortality *Population studies*
- f) A study of the relationship between educational attainment and declining levels of fertility. *Population studies*
- g) An analysis of fertility trends and changes in consumption patterns *Population studies*
- h) A study of the aging of population and changes in voting patterns. *Population studies*
- i) The analysis of changes in demographic variables mathematically. *Formal demography*

5. Demonstrate your understanding of the population structure by answering the following questions:

- a) At which stage of aging is a population with a median age of 27 years? *intermediate*
- b) At which stage of aging is a population with a median age of 17 years? *young*
- c) At which stage of aging is a population with a median age of 34 years? *old*
- d) In what age category is a 56 years old man? *middle age*
- e) In what age category is a 66 years old man? *old age*
- f) How about a 23 years old woman? *youth*
- g) And a 7 year old boy? *child / young people*

6. On the basis of the data below, compute the relevant rates and briefly interpret the results.

- a) Overall dependency ratio
- b) Child dependency
- c) Aged dependency

Zambia (1980)

$$\frac{3,540,305}{7,383,097} \times 100$$

47.9

48

Age group	Population
0-14	3,349,672
15-64	3,842,792
65+	190,633

d) Crude death rate = $\frac{\text{Deaths}}{\text{Population}} \times 1000 = \frac{10,063}{1,171,000} \times 1000$

8.59

Costa Rica (1960)

Deaths	10,063
Population	1,171,000

In Costa Rica, for every 1000 people in the population of Costa Rica, there were 9 deaths in the year 1960

e) The sex ratio = $\frac{\text{No males}}{\text{No females}} \times 100 = \frac{3617577}{3765520} \times 100$

Sex	Population
Male	3617577
Female	3765520

= 96.07

= 96

The ratio of males to females was 96

7. Which of the statements below best describes i) external demographics ii) cluster marketing iii) targeting iv) segmentation v) cluster marketing vi) none.

- Manufacturing and packaging of products or the provision of services that appeal to specific socio demographics identifiable groups within the population. *Segmentation*
- Picking out particular socio-demographic characteristics of people who might purchase what you have to offer, and then appealing to the consumer tastes and behaviour reflected in those characteristics. *targeting*
- Targeting neighbourhoods with a where set of shared socio-demographic statistics. *cluster marketing*
- Analysis of the demographic characteristics of the workers with a view of improving their conditions of service. *work*
- Carrying out a market research and then aggressively advertising it on television and radio. *external demographics*

8. Use examples and briefly describe what you understand by the following:

- Crude Rate
- Specific Rate
- Constant
- Probability The event and chances of its happening
- Cohort Measures
- Period Measures

END OF TEST

c) The sex ratio

Morocco (1960)

Males	5,809,172
Females	5,817,060

$\frac{M}{F} \times 100$

d) The dependency ratio

India (1961)

Age group	Population
0-14	180,019,000
65 and above	13,468,000
15-64	245,112,000

e) Briefly explain how the median age is used as a measure of the aging of the population and show whether Zambia has a young, intermediate or an old population?

3. Briefly explain, with examples where possible, what you understand by the following:

- a) Life expectancy
- b) Total fertility rate
- c) In-migration
- d) Immigration
- e) Out-migration
- f) Emigration
- g) Prevalence rate
- h) Case fatality rate
- i) Completed family size
- j) Net reproduction rate
- k) Maternal mortality rate
- l) Infant mortality rate

SECTION B

ANSWER ONE QUESTION ONLY

1. Discuss the importance and relevance of the following concepts in market research:

- a) Segmentation
- b) Targeting
- c) Cluster marketing

2. Compare and contrast the views of Thomas Malthus and Karl Marx on population. Which views do you think are relevant to the Zambian situation?

Handwritten notes:
 10/11/2012
 10/11/2012
 10/11/2012

3. Explain how demography can contribute to our understanding of the following problems:

- a) Inflation
- b) Environmental issues, particularly global warming
- c) Energy shortages

SECTION C

ANSWER ONE QUESTION ONLY

1. Discuss, with examples where possible, how:

- a) Fertility and mortality may influence a woman's status.
- b) Economic development factors may influence demographic variables.

2. Discuss, with examples where possible, how:

- a) A woman's status may influence fertility and mortality.
- b) How demographic factors may influence economic development.

3. Discuss the relevance of demographics in:

- a) Political planning
- b) Legislative analysis

END OF EXAMINATION

- c) The sex ratio

Morocco (1960)

Males	5,809,172
Females	5,817,060

Briefly interpret the result.

- d) The dependency ratio

India (1961)

Age group	Population
0-14	180,019,000
65 and above	13,468,000
15-64	245,112,000

Briefly interpret the result.

5. Indicate the age classifications of individuals with the following ages:

- a) A 23 year old Evelyn Hone student
- b) A 76 year old peasant farmer
- c) A 50 year old primary school teacher
- d) A 9 year old Grade 3 pupil.

6. Briefly explain how the median age is used as a measure of the aging of the population and show whether Zambia has a young or an old population?

7. Briefly, what do you understand by these two terms in relation to human resource planning?

- a) Internal demographics
- b) External demographics

8. Demonstrate your knowledge of current affairs in population matters by answering the questions below:

- a) Who between John Graunt and Thomas Malthus was a clergyman?
- b) What were the full names of Marx and of Engels?
- c) Who between Halley, Malthus, and Graunt came up with the first life table?
- d) Which two demographers did some ground-breaking work on the logistic curve?
- e) What was one major contribution of Alfred Lotka to demography?
- f) Who pioneered the use of statistical methods in evaluating demographic data?
- g) Who established the Population Council?
- h) What acronym does the United Nations Population Fund use?

3 fred reach
kate

SECTION B

ANSWER ANY ONE QUESTION FROM THIS SECTION

1. Discuss with, relevant examples, the factors that influence levels of fertility.
 2. How and in what ways can demographic information be useful and relevant in political planning? *HPM.*
-

SECTION C

ANSWER ANY ONE QUESTION FROM THIS SECTION

3.
 - a) What is the main difference between a census and a sample survey?
 - b) Discuss how a typical population register operates.
 4. Discuss how the following may be helpful or harmful to economic development?
 - a) Population growth rate
 - b) Population size
 - c) The population age structure
-

END OF EXAMINATION

THE UNIVERSITY OF ZAMBIA
SCHOOL OF HUMANITIES AND SOCIAL SCIENCES
2004 ACADEMIC YEAR FIRST SEMESTER FINALEXAMINATIONS
DE 111: INTRODUCTION TO DEMOGRAPHY

TIME: THREE HOURS

INSTRUCTIONS: Answer all questions in SECTIONS A, B, and C and any two questions from SECTION D

ANDREW B.

SECTION A: ANSWER ALL THE MULTIPLE QUESTIONS IN THIS SECTION

1. Choose one correct answer from each of the following statements:

a. A population with a median age of 27 is of intermediate age.

- i. True ☒
ii. False

below 20 and
btr 21-29 later
30 → older

b. A sex ratio measures the number females per 100 males

- i. True ☒
ii. False

c. Marx and Engels believed that each economic system has its own laws of population.

- i. True ☒
ii. False

d. Thomas Malthus pioneered the construction of the life table

- i. True ☒
ii. False

e. The idea of the logistic curve of the population was made popular by Alfred Lotka

- i. True ☒
ii. False

f. In which year was the Demography Training and Research programme established at the University of Zambia

- i. 1978
ii. 1980
iii. 1986
iv. 1990

g. The Demography Training and Research programme at University of Zambia funded by:

- i. The Population Council
ii. UNFPA ☒
iii. UNDP
iv. WHO

h. Formal demography involves:

- I. The interdisciplinary approach to the study of demography involving biology and the social sciences
- II. The sociological analysis of population trends
- III. The economic analysis of process of population change
- IV. The collection and statistical analysis of demographic data

i. Population studies involves:

- I. The collection and statistical analysis of demographic data.
- II. The interdisciplinary approach to the study of demography involving biology and the social sciences
- III. The sociological analysis of population trends
- IV. The economic analysis of process of population change

j. One of John Graunt's contribution to development of demography was:

- I. Establishing that each economic system has its laws of population.
- II. Pioneering the use of statistical methods in evaluating demographic data.
- III. Refining the application of the logistic curve to the understanding of population growth
- IV. Establishing demography as a separate discipline

SECTION B (ANSWER ALL QUESTIONS)

2. Respond to all of the following questions:

- (a) What is the difference between the population growth rate and the rate of natural increase
- (b) How long will take a country with a 3.5% annual population growth rate to double its population? 20 yr
- (c) What is the population (or balancing equation) equation?
- (d) What is the difference between emigration and immigration?

3. Explain what is likely to happen to the population age structure in the following situations (underline what you consider to be the correct answer):

a. High fertility and low mortality:

The population ages/The population gets younger/Nothing changes

b. Low fertility and low mortality:

The population ages/The population gets younger/Nothing changes

4. On the basis of the data below, compute the relevant rates and interpret the results.
