 - f) Exactly what role did this organisation play in the development of demography? What is this international organisation known today?
 - g) Which other academic institution played a collaborative role with this institution?

4. What are the nationalities of the following scholars who contributed to development of demography?
 - a) Sir William Petty
 - b) Thomas Halley
 - c) Alfred Lotka
 - d) Ansley Coale
 - e) Frank Notestein
 - f) John Rockefeller
 - g) Louis Dublin
 - h) P.K Whelpton
 - i) Frank Notestein

5. State whether the following statements are **True** or **False** or **Neither**.
 - a) John Graunt discovered that in London, births exceeded deaths. On the other hand, in rural areas, deaths exceeded births.....
 - b) Both Sir Petty Williams and Graunt pioneered the use of statistical methods in evaluating demographic data.....
 - c) Karl Marx (1818-1883) and Frederick Engels advocated for a socialist economy.....
 - d) Demography can help to determine the age of entry into the labor market.
 - e) In Zambia the age of entry into the labour force is 12 years.

6. Which of the statements below best describes i) **Human resource planning**; ii) **Investment planning**; iii) **Targeting**; iv) **Segmentation**; v) **Cluster marketing**; and vi) **None**
 - a) Goods and services packaged or "tailor-made" to appeal to specific socio- demographic groups within the population.

- b) Appealing to current and potential consumers of a popular detergent on the basis of their assumed tastes and behaviours as reflected in socio-demographic characteristics through aggressive advertizing on ZNBC TV.
- c) Analysis of the demographic characteristics of the workers with a view of improving their conditions of service
- d) Establishing a shopping mall in an upmarket area of Lusaka inhabited by predominantly young, high income, and upwardly mobile residents.
- e) Analyzing demographic trends in Africa with an eye on setting up computer manufacturing plants.

7. Complete the matrix below by inserting in the age range which best fits in the stages in one's life cycle.

Stage in life cycle	Age range
Childhood	0 - 9
Adolescence	10 - 19
Early youth	15 - 24
Mature youth	19 - 24
Middle age	20 - 29
Young old	30 - 65
Old	65 +
Very old	75 +

- a) The World Health Organization (WHO) revised its age classifications last year. What is now considered:
 - i. Youth and young people?
 - ii. Middle aged?
8. Demonstrate your understanding of the aging of populations by responding to these questions:
- a) What is the commonly used indicator in measuring the aging of the population?
 - b) What are the threshold values used for this?
 - c) Based on a) and b), how old is Zambia's population?
9. In political planning, demographic information is used in the creation of new districts and constituencies in order to enhance political representation.
- a) What is the number and names of parliamentary constituencies in :

City/town	Number of parliamentary constituencies
i. Lusaka	14
ii. Kitwe	4
iii. Ndola	
iv. Mufulira	3
v. Chingola	
vi. Kabwe	
vii. Livingstone	
viii. Luanshya	2

- b) Complete the matrix below by indicating any new districts which have been created in the following province since 2010. If there is no new district, just write **none**.

Province	New district
i. Copperbelt	Kalulushi
ii. Central	None
iii. Eastern	None
iv. Luapula	None
v. Lusaka	Kafue
vi. Muchinga	None
vii. Northern	None
viii. Northwestern	None
ix. Southern	None
x. Western	None

- c) In the past, attainment of city status was a function of population size. Indicate, in chronological order, three towns between 1960 and 1970, which attained city status based on this criteria?

SECTION B

- On the basis of the data below, compute the relevant rates and briefly interpret the results and possible implications of the results.

- Overall Dependency ratio
- Child Dependency ratio

c) Aged Dependency ratio

Age group	Population
0-14	3,349,672
15-64	3,842,792
65+	190,633

2. Outline the four (4) major reasons why it is important for a developing country like Zambia to study its population.
3. Demonstrate your understanding of the population balancing equation paying particular attention to its major components.
