

Dikhilani Mvula

SOFTWARE ENGINEER

CONTACT +260 763 665 966 · deekymvula@gmail.com · Kitwe, Zambia

PROFILE Python developer with real-world mining sector domain knowledge and a track record of building automated data pipelines from scratch. Spent 12 months embedded inside Kansanshi Mining Plc (First Quantum Minerals) — one of Zambia's largest copper operations — processing high-volume financial data and working directly with the procurement and operations data systems that drive exploration-stage mining businesses. Subsequently built a production content pipeline at Booklessss using Python, AI tooling, and automated ingest workflows. Eager to apply both the technical depth and the ground-level mining intuition to data systems that directly guide exploration decisions.

- EXPERIENCE
- Founder & Technical Lead | 2025 – Present**
- Booklessss · Zambia (edtech startup)*
- Designed and built a Python-based content production pipeline end-to-end — source ingest, AI-assisted processing, and automated PDF generation via ReportLab — reducing time from raw lecture material to publication-ready output to under one day per lesson
 - Architected the full data system: folder structure, build scripts, asset resolution, and output routing — all scripts are self-contained and reproducible from source
 - Integrated AI language models directly into the content workflow using the Claude API — applying prompt engineering and structured outputs to transform unstructured lecture material into structured, formatted documents at scale
 - Owned the full product lifecycle: problem definition, system design, implementation, iteration on user feedback, and ongoing operations — solo, with no engineering team
 - Built unit economics model and pricing architecture using financial modelling; manage four active courses across two Zambian universities

Finance Intern | 2024 – 2025 (12 months)

Kansanshi Mining Plc (First Quantum Minerals) · Solwezi, Zambia

- Embedded inside one of Zambia's largest copper mining operations — processed high-volume financial data across AP, AR, budgeting, and reporting workflows in an enterprise mining systems environment
- Worked directly with procurement data at scale: supplier invoices, contractor records, and multi-level approval pipelines across a complex operational structure
- Delivered month-end close responsibilities under formal reporting procedures — gained direct exposure to how financial data flows through a large mining organisation and where manual processes create bottlenecks
- Developed working knowledge of how mining operations are structured at the project level — procurement cycles, contractor relationships, and the data that underpins operational decisions

Finance Manager | Jan 2026 – Present

Khadzika Enterprises Limited · Kitwe, Zambia

- Manage commercial operations for a mining-focused procurement business — clients include Mopani Copper Mines, BIA Group, KCM, and CEC
- Coordinate international supply chains across USA and South Africa: supplier sourcing, specification matching, and inbound freight
- Own financial data end-to-end: multi-currency invoicing, accounts receivable, and ZRA-compliant reporting in both USD and ZMW

EDUCATION

Bachelor of Accounting and Finance

ZCAS University · Lusaka, Zambia · Graduated 2026

Business Information Systems · Research Methods · Dissertation · Financial Modelling & Forecasting · Corporate Finance · Treasury Management · Investment & Portfolio Management · Financial Management · Financial Reporting · Strategic Management · International Trade & Finance · Introduction to Quantitative Methods · Introduction to Economics · Innovation & Entrepreneurship · Introduction to Management

SKILLS

- | | |
|--|---|
| • Python (scripting, data pipelines, automation) | • System Design & End-to-End Ownership |
| • AI/LLM Integration & Prompt Engineering | • Financial Data Analysis & Modelling |
| • Data Pipeline Design & Ingest Workflows | • Technical Communication with Domain Experts |
| • Mining Sector Domain Knowledge (Zambia) | • International Supply Chain & Procurement |
